

Navdeep Bhanderi

SENIOR FRONTEND ENGINEER

navdeepbhanderi1@gmail.com · +91 63539 57997

navdeepbhanderi.dev

github/navdeepbhanderi · in/navdeepbhanderi

Junagadh, GJ, India · Remote-friendly

Frontend engineer who reads a requirement all the way through before writing code, then builds and delivers it end to end. Comfortable enough on the backend (Node.js) to build and reason about the system behind the UI, not just consume it. Brings team-leadership experience — coordinating delivery and keeping the team on track.

EXPERIENCE

Senior Frontend Engineer ·

Jul 2024 – Present

Softrefine Technology Pvt. Ltd.

- Lead the frontend side of a client engagement — start from the full requirement, not just the ticket, then split and deliver the build across the team.
- Own work end to end, including backend pieces (Node.js) when the feature calls for it.
- Stay close to the rest of the team's work to catch issues before they reach QA.

Software Developer Intern ·

Jan 2024 – Jun 2024

Softrefine Technology Pvt. Ltd.

- Moved from coursework to shipping production code on live client projects across the stack.

SELECTED PROJECTS

Travel Commerce Platform · Frontend Engineer

2024

Angular · TypeScript · Angular Material · TailwindCSS · REST

- Built the agent-facing package builder for a B2B travel SaaS — flights, hotels, activities, transfers, and insurance assembled from live inventory, re-pricing automatically as anything changes.
- Built post-booking modification flows — swap a hotel, shift dates, upgrade a flight — with pricing, taxes, and availability recalculated without rebuilding the package.
- Added clone-and-edit itinerary reuse, cutting requotes from hours of rebuilding to minutes.
- Migrated the codebase across seven major versions, Angular 12 → 19, while shipping feature work in parallel.

Attendance Admin Panel · Smart India Hackathon

2023

HTML · TailwindCSS · JavaScript · PHP · [code on GitHub](#)

- Built the admin panel solo within the hackathon timeframe: faculty and student records, per-class weekly scheduling, and a live classroom dashboard fed straight from the database.
- System verified check-ins against campus WiFi — no biometrics, no hardware, no proxy attendance.

SKILLS

Frontend

Angular, React, Next.js, JavaScript, TypeScript, TailwindCSS

Backend

Node.js, NestJS, Express.js, PHP

Databases

SQL, PostgreSQL, MongoDB, Firebase

Languages

JavaScript, TypeScript, Java, C++

AI

Generative AI tools, LLM applications

Tools

Git, GitHub, VS Code, Postman, Figma, Linear, npm

EDUCATION

B.Tech, Information Technology

Dr. Subhash University · Jul 2023 — Apr 2026 — completed while working in the industry

Diploma, Computer Engineering

Dr. Subhash Technical Campus · Aug 2020 — May 2023

OPEN TO

Full-time opportunities · Freelance projects · Startup collaborations · Product engineering roles
